

PCP BC - Fundamentals of Blockchain

Course-end Project 2: Customised Blockchain Workspace Setup and Smart

Name: Neeleshwari Mehra

Description

A financial institution is exploring blockchain technology for decentralized applications. As part of their initial phase, they aim to set up a customized blockchain environment using Ganache, integrate it with MetaMask for account management, analyze transaction history, and deploy a simple smart contract using Remix.

Project: Customised Blockchain Workspace Setup and Smart

1. REMIX IDE CODE:

```
// SPDX-License-Identifier: MIT

pragma solidity ^0.8.0;

contract HelloWorld {

    string public message;

    constructor() {
        message = "Hello Blockchain World";
    }

    function setMessage(string memory _msg) public {
        message = _msg;
    }
}
```

```
function getMessage() public view returns(string memory) {  
    return message;  
}  
}
```

☒

Process transactions instantaneously.

ERROR ON TRANSACTION FAILURE

☒

When transactions fail, throw an error. If disabled, transaction failures will only be detectable via the "status" flag in the transaction receipt. Disabling this feature will make Ganache handle transaction failures like other Ethereum clients.
